Class X (CBSE)	DPS, Vindhyannagar	95.00%	2014

Summer Internship

Pretium Enterprise Services | Data Analyst April 2025 – June 2025

- Identified delay in routing 300+ client emails/day & designed a 2-stage ML model, reducing avg. routing time by ~40%
- Leveraged AutoML & AdaBoost to build a classification model supporting operational compliance and audit accuracy
- Developed priority-based agent routing framework with urgency matrices and exception-escalation logic for daily routing
- Formulated ILP-based assignment strategy to optimize fleet usage and improve on-time regulatory task completion

Professional Experience

Tata Consultancy Services | Systems Engineer (Digital Cadre) Aug 2020 – Jul 2024

- Spearheaded team of 3 people while working on a regulatory reporting project for a leading US-based financial firm
- Performed root-cause analysis on 1000+ data tables to identify & patch defects, reducing transaction errors by 13%
- Collaborated with cross-functional teams in risk, operations & technology to enhance application performance by 30%
- Led & Mentored 3 new joiners on the compliance team's coordination role, improving team productivity by 33%
- Improved stability and performance of an existing banking system by 20% by streamlining data flows and controls
- Led API integration team on a high-impact US banking project generating \$300K per quarter with operational standards
- Successfully delivered 10+ sprints with an 80% First-Time Right (FTR) rate on a complex banking compliance project

Projects

Corporate Valuation | Ather Energy Valuation July 2025 – Sep 2025

- Developed a comprehensive financial model for **Ather Energy** to project revenue streams and yearly cost structures
- Executed a 10-year **predictive modeling** exercise to forecast financial statements, utilizing **DCF** and relative valuation
- Authored a detailed equity research report providing strategic valuation insights and investment recommendations

Investment | Volatility Asset Class Prediction July 2025 – Sep 2025

- Analyzed event-driven volatility and IV crush patterns across global markets to identify structural inefficiencies
- Evaluated Sharpe and Sortino ratios to ensure consistent, risk-adjusted returns during high-volatility market events

Predictive Analytics | Lifestyle Risk Premium July 2025 – Sep 2025

- Clustered lifestyle patterns into distinct behavioral risk groups using ML segmentation for premium risk analytics
- Extracted 2 key risk drivers via factor analysis; evaluated multiple ML models to predict obesity-linked premium risk
- Recommended lifestyle-based questionnaire for differential pricing from hypothesis testing on behavioral data

Position of Responsibilities

President | Technalytics, IIM Udaipur June 2025 – Mar 2026

- Selected from 330+ candidates to lead 30+ member team, overseeing strategy & driving engagement across initiatives
- Managed end-to-end planning for 370+ students, coordinating closely with admin team to ensure timely execution
- Drove collaboration across sub-teams by building structured action plans to ensure on-time delivery of initiatives

Achievements and Skills

- Emerged Campus Winner in **Thoucentric Bottoms Up** in Digital Track from 1700+ teams participating nationwide
- Certified in Six Sigma Green Belt** – Grant Thornton (process improvement), **Power BI** (data visualization), McKinsey's Forward Program (Structured Problem Solving), Prompt Engineering (Automating LLMs for research)
- Tools:** Python (Pandas, NumPy, Scikit-learn), TensorFlow, Generative AI, Agentic AI, Angular, React, SQL, Java
